ABOUT ME

Recent Computer Science graduate passionate about databases and backend development, seeking an entry-level SQL Developer role to apply academic knowledge and grow in a professional environment. Motivated Computer Science graduate with strong SQL skills and understanding of relational databases. Eager to contribute to database design, optimization, and support in a fast-paced environment

EDUCATION

2020 - 2021

Rose Mary
matriculation Higher
secondary School

Branch-Maths Biology

Percentage - 80%

2021- 2025

Francis Xavier
Engineering College

Bachelor of Engineering

In the Stream of computer Science with a CGPA - 8

SKILLS

- Knowledge in SQL
- Basic Knowledge in Python Programming
- Knowledge in Front-end HTML Development
- Knowledge in Front-end CSS Development
- Enhancing React.js and Javascript through Institute.

PROJECTS

• Voice Assistant(May-2024)

--Developed a voice assistant application using Java that processes user voice commands to perform tasks like opening applications.

• Car Damage Detection and Cost Estimation(Mar-2025)

--Developed a car damage detection and cost estimation system using Python. The model analyzes vehicle images to identify damaged areas and predicts repair costs based on a labeled dataset.
